Evening Ambient lighting and much more...

SSI strives to be a customer oriented organization. Our dedication to working closely with end users and/or integrators sets us apart from others which allows for the highest quality workmanship and customer satisfaction available. As all custom projects vary significantly in design and function, our ability to offer various glass thicknesses, shapes and custom cell colourings will exceed all customer expectations.

In compliance with solar manufacturing regulations, all SSI products manufactured meet FIT and LEED requirements. ULC certification also available. (project based).
